TURN-UP // DOWN TOOLS

Our Turn-Up/Down Tool is a heavy duty version of our popular Turn-Up Tools. This tool is designed to fit a common metal panel used in the western United States. The tool can also be used to bend the low end of the panel at the eave to reduce water from tracking between the panel and the eave flash.

SPACER BARS

Our Universal Spacer Bar eliminates panel creeping on trapezoidal standing seam roof panels by supporting the rib during panel clip installation maintaining 24" panel module and eliminating gaps around closures.

Our tool provides:

- *24" panel module (no creeping)*
- *Eliminates gaps around closures*

*Spacer Bars are a must
when installing trapezoidal
standing seam roofing*
